

# OrgPublisher

Create professional Orgcharts simplifying organizational chart design

OrgPublisher™ for Oracle Human Capital Management, SAP HCM, SAP SuccessFactors, NEXUS Group, Meta4, Workday Inc., Ultimate Software, Peoplesoft HCM and more.

Whether operating in the private or public sector, organizations today are affected by constant change. Mergers and acquisitions, departmental reorganizations and the constant ebb and flow of employees mean that human resources departments are challenged to maintain accurate, up-to-date records.

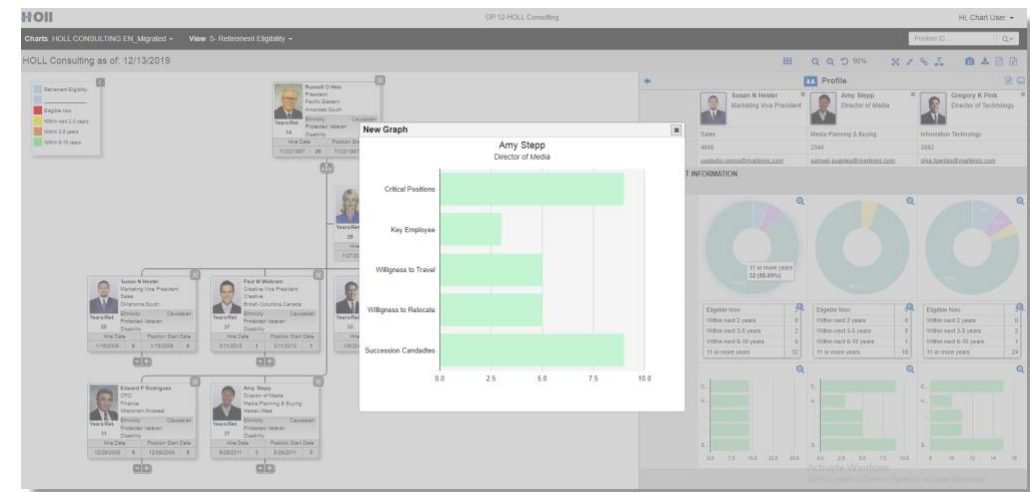

Effective talent management relies on a motivated workforce. Using an organization's intranet to access published organization charts, employees can view online employee directories, understand administrative hierarchies or perform data analysis to be both better informed and more readily engaged.

**PeopleFluent OrgPublisher 12** is a new version for clients currently using OrgPublisher versions prior to 11.16 **or new customers**. It includes many features such as an easy access to status, publish, and view chart from every page; the ability to export and import charts; chart administration; search properties; group definition and management; design positions and fields; and much more.

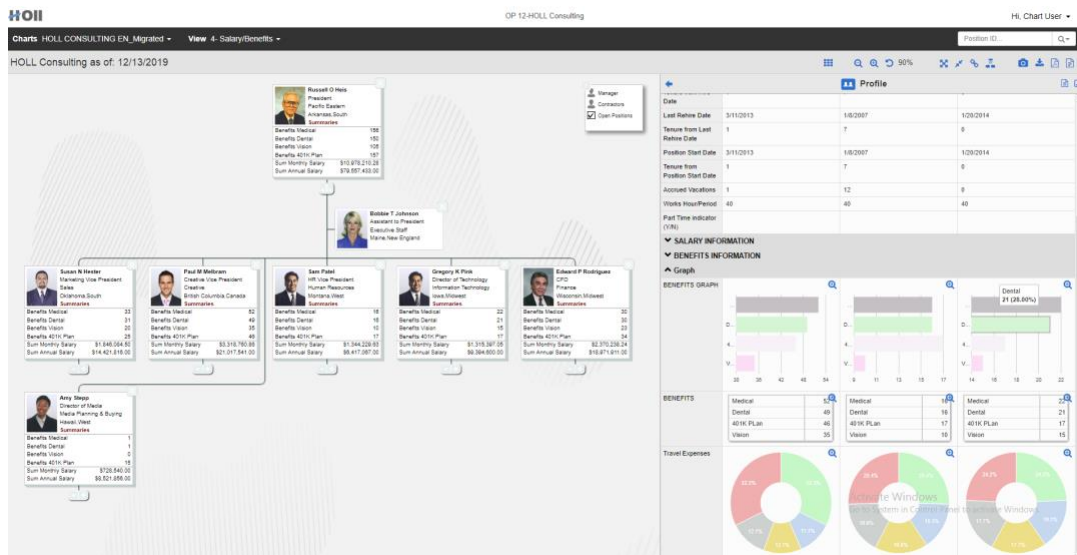

# OrgPublisher OP 12 - Benefits

- **Easier and faster ways of importing your own data sources:** Including compensation, performance, budgeting, etc. Use multiple data sources with charts, add records to the hierarchy, and add custom fields.
- **Custom field capabilities:** They enable you to show the information that is specific to your organization.
- **Visualize your workforce in various ways:** Use highly configurable charts to meet the needs of different audiences, with the assurance that access is controlled to restricted information.
- **Support for multiple languages:** Because so much of business today is global.

- **Accurate and current information:** Available to alleviate the manual process required to build static organizational charts that fall out of date as quickly as they are created.
- **Create dynamic management data:** Enable different user communities to access to organizational information that they need for informed decision-making.
- **Identify succession planning highlights:** View employee performance versus potential data to better track talent.
- **Access powerful reporting capabilities:** Enjoy a flexible, scalable interface with simple integration and implementation. Extend quick search. Easily search and email employees.
- **Easily visualize metrics, clusters and exceptions with colored “heat maps”.**
- **Create a custom view of the organization:** Capture any view of the chart and export it to a PDF as a single or multi-page report.
- **Filter or highlight employee groups:** Use pre-defined or ad-hoc criteria. Expand one level or an entire span-of-control.

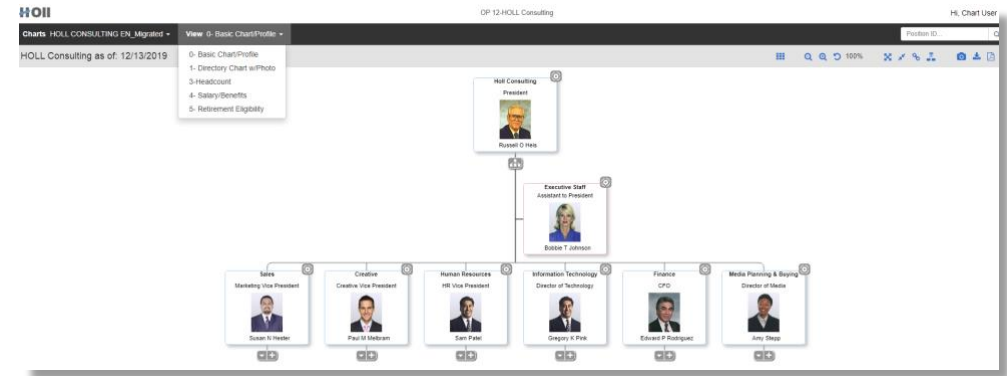

# About HOLL Consulting

HOLL Consulting is a company specialized in OrgCharts.

Using the New **OrgPublisher OP 12**, a WEB BASED Org Charting software, we create different organization charts for your company, with independent views and user access. It does not require a browser plug-in for a secure browsing experience, and it reduces the maintenance effort for IT.

In **HOLL Consulting** we are used to work with a partner ecosystem such as Oracle Human Capital Management, SAP HCM, SAP SuccessFactors, NEXUS Group, Meta4, Workday Inc., Ultimate Software, Peoplesoft HCM and more.
